

Keep the whole picture visible.

Rebuilt from your PDFs, with all three audiences together and the latest wording corrections preserved.

THE CHALLENGE

BANKS - DIMENSION 01

Information blindness

01 Bank challenge

02 Bank challenge

03 Bank challenge

04 Bank challenge

05 Bank challenge

06 Bank challenge

07 Bank challenge

08 Bank challenge

MERCHANTS - DIMENSION 02

3 merged issues. Every point retained.

CUSTOMERS - DIMENSION 03

3 merged issues. Every point retained.

At a 1366 x 768 browser viewport, the entire problem overview fits below the sticky header. Keep the bank grid in two rows and the lower panels side by side.

ONE DEVICE

FOR BANKS

7 benefits

Acquisition
Transactions
Merchant lending
Direct loans
Relationships
CASA potential
A stronger offering

SMART DEVICE

YOUR BANK'S QR CODE

Curved connections

FOR CUSTOMERS

4 benefits

Status, offers, smarter journeys
and easier visits.

FOR MERCHANTS

6 benefits

Mobile shop control
Local discovery
Business visibility
Direct offers
Theft-risk alerts
Fire and smoke alerts

All 17 benefits are visible together on a laptop. No tabs, carousels or hidden audience panels. On phones, panels stack and every item remains expanded.

Center green section labels. Keep the logo blue. Keep DIMENSION smaller than each audience.

Run it. Edit it. Keep it clear.

The package includes editable source, the completed production build and detailed designer directions.

Preview immediately

Extract the ZIP. With Node.js 22 or newer installed, open a terminal inside the **hereopen-website** folder and run:

```
node scripts/serve.mjs
```

Open **http://127.0.0.1:4317** in your browser. Keep the terminal open. This uses the included **out/** folder and requires no package installation.

Edit and rebuild

npm install, then **npm run dev** for the development preview at port 3000. After edits, run **npm run build** to refresh the production files. The README also includes the tested pnpm workflow with the supplied lockfile.

Where your designer should work

src/components/ - opening, supplied images, phone demo and vision.

src/content/site.js - benefits, workflow, nine FAQs and contact details.

src/app/ - page order, brand, comparison and responsive styles.

See **DESIGNER-HANDOFF.md** for the full file map and content rules.

Keep the approved wording and order

Open with **LOSING THE COMPETITIVE EDGE OVER FINTECHS?** and **PARTNER WITH US**. Keep the earlier green website colours and blue H logo. Use the new hero image. Put **OUR SOLUTION** above the corrected feature image after The Challenge and add it to the menu. Keep the animated phone controls. **Smart device** in the menu opens the next image under **SMART DEVICE**, followed by readable benefits. Put **The Partnership** before the nine questions. Use **FAQ** for their heading and menu label; remove For Banks.

Keep **90+ Crore internet users** and **6.3+ Crore MSMEs**. Put the main **OUR VISION** heading above the navy section; use a small plain label inside the vision statement card. Use **To Provide a Platform Where Banks Lead.** and the new MSME and Banks text. Add **Home** and **Contact** to the menu. Preserve the separate fire and smoke strip and unnumbered section headings.

Contact form and publishing

Place **Submit** below **How can we help?** It opens an email draft; the visitor must review and send it. Connect the existing form API for automatic submission. To host the static website, upload the **contents of out/** to the domain root, preserving assets and existing legal routes. This package has not replaced the live site.

Read **README.md** for commands and **DESIGNER-HANDOFF.md** for the complete layout and content directions. The new source uses Next.js/React with JavaScript/JSS and CSS, matching the framework visible on the current website.
